## • supplies

## • configuration

- medical supplies in zip-off sections
- sections allow medical and pharmaceutical supplies to be divided into separate areas
- dividers in each section allow for easy organization
- large openings create easy access to supplies
- 2 dividers can be removed from pharmaceutical portion of backpack

## • deconstruction

- fold out chair can be made into a stretcher for emergencies
- chair becomes frame for backpack
- straps un-buckle and allow chair to attach
- chair leg becomes frame support for bottom of backpack
